

(1) Ask someone to help you take your measurements on a hard-floor surface. Doing it yourself can negatively affect the outcome. (2) Position your heel and instep where indicated on the chart, with your weight evenly distributed between both feet. Have your helper place a pen mark at the tip of your longest toe. Measure both feet, (3) The longest mark from your heel-to-toe measurements will be your shoe size. If you are in-between lines, go up to the next size (Example: in-between 7 and 7.5, choose 7.5). (4) If you are planning to use your shoes for walking at a theme park, we recommend you always purchase the next size measurement to accommodate additional foot swell.

## ACCURACY CHECK

To ensure the size accuracy of this chart, place a credit card here. If it fits, the chart was printed correctly. If it does not fit, make sure that PAGE SCALING is turned off in the print dialog box before printing again. The output must be 100% to size, for an accurate measurement of your foot.

2-1/8" x 3-3/8"
